

Western New York

Hunger Action received 21 responses from surveys distributed throughout Western New York, with 3 from Cattaraugus, 2 from Chautauqua, 14 from Erie, and 2 from Niagara. The surveys included responses from food pantries, soup kitchens, programs that operate both a food pantry and a soup kitchen, and other programs that provide food, such as shelters, etc. The Hunger Impact Survey yielded the following results for Western NY:

I. The report found a 21.2% increase in the number of individuals fed by EFPs in Western New York comparing September of 2002 to September of 2003.

- Hunger Action asked all programs who completed the survey (food pantries, soup kitchens, etc) to provide data on the number of people they provided with food in September 2002 and September of 2003. 15 programs provided data for both of those months.

II. 14.3% of programs do not distribute enough food to meet their current demand. 21 programs responded to this question.

- 85.7% do distribute enough to meet their current demand.
- 0% are unsure if they distribute enough food to meet the current demand.

Of the programs that do not distribute enough to meet their current demand, 66.6% have enough capacity (storage space, refrigeration, staff and/or volunteers) to safely increase the amount of food they distribute. 3 programs responded to this question.

- 33.3% do not have enough capacity to safely increase the amount of food they distribute.
- 0% were unsure.

III. 70% of programs reported that their food and money resources from the government decreased in the last year. 20 programs responded to this question.

- 5.0% of programs reported that their government resources decreased greatly.
- 65.0% of programs reported that their government resources decreased somewhat.
- 20.0% of programs reported that their government resources stayed about the same.
- 10.0% of programs reported that their government resources somewhat increased.
- 0% of programs reported that their government resources greatly increased
- 0% of programs were unsure.

IV. 57.9% of programs reported that their food and money resources from the private sector decreased in the last year. 19 programs responded to this question.

- 31.6% of programs reported that this category of resources decreased greatly.
- 26.3% of programs reported that this category of resources decreased somewhat.
- 31.6% of programs reported that this category of resources stayed about the same.
- 5.3% of programs reported that this category of resources somewhat increased.
- 0% of programs reported that this category of resources greatly increased
- 5.3% of programs were unsure.

- V. **63.2% of programs reported that their total food and money resources decreased in the last year.** 19 programs responded to this question.
- 21.1% of programs reported that this category of resources decreased greatly.
 - 42.1% of programs reported that this category of resources decreased somewhat.
 - 26.3% of programs reported that this category of resources stayed about the same.
 - 5.3% of programs reported that this category of resources somewhat increased.
 - 0% of programs reported that this category of resources greatly increased
 - 5.3% of programs were unsure.
- VI. **81% of programs reported that the overall number of customers needing food increased in the last year.** 21 programs responded to this question.
- 33.3% reported that the overall number of customers greatly increased
 - 47.6% reported that the overall number of customers somewhat increased.
 - 14.3% reported that the overall number of customers stayed about the same.
 - 0% reported that the overall number of customers decreased somewhat.
 - 4.8% reported that the overall number of customers decreased greatly.
 - 0% were unsure.
- VII. **28.6% of programs reported that the people with paid employment using their program increased in the last year.** 21 programs responded to this question.
- 4.8% reported that this category of customers greatly increased
 - 23.8% reported that this category of customers somewhat increased.
 - 42.9% reported that this category of customers stayed about the same.
 - 14.3% reported that this category of customers decreased somewhat.
 - 0% reported that this category of customers decreased greatly.
 - 14.3% were unsure.
- VIII. **38.1% of programs reported that the number of senior citizens using their program increased in the last year.** 21 programs responded to this question.
- 9.5% reported that this category of customers greatly increased
 - 28.6% reported that this category of customers somewhat increased.
 - 47.6% reported that this category of customers stayed about the same.
 - 4.8% reported that this category of customers decreased somewhat.
 - 0% reported that this category of customers decreased greatly.
 - 9.5% were unsure.
- IX. **61.9% of programs reported that the people who receive inadequate pay using their program increased in the last year.** 21 programs responded to this question.
- 23.8% reported that this category of customers greatly increased
 - 38.1% reported that this category of customers somewhat increased.
 - 23.8% reported that this category of customers stayed about the same.
 - 0% reported that this category of customers decreased somewhat.
 - 0% reported that the overall number of customers decreased greatly.
 - 14.3% were unsure.

- X. 47.6% of programs reported that number of children (under age 18) using their program increased in the last year.** 21 programs responded to this question.
- 14.3% reported that this category of customers greatly increased
 - 33.3% reported that this category of customers somewhat increased.
 - 47.6% reported that this category of customers stayed about the same.
 - 4.8% reported that this category of customers decreased somewhat.
 - 0% reported that this category of customers decreased greatly.
 - 0% were unsure.
- XI. 38.1% of programs reported that they had to turn people away, reduce the amount of food distributed to each person, or limit their hours of operation in 2003 because they lacked enough resources.** 21 programs responded to this question.
- 61.9% of programs reported that they did not have to turn people away, etc.
 - 0% were unsure.
- XII. 90.5% of programs think that the demand for food will continue to increase over the next six months.**
- 23.8% think it will greatly increase.
 - 66.66% think it will increase somewhat.
 - 9.5% think it will stay about the same.
 - 0% think it will decrease somewhat.
 - 0% think it will greatly decrease.
 - 0% are unsure.
